The name film originates from the fact that photographic film also called film stock has historically been the medium for recording and displaying motion pictures. Many other terms exist for an individual motion-picture, including picture, picture show, moving picture, photoplay, and flick. The most common term in the United States is movie, while in Europe film is preferred. Common terms for the field in general include the big screen, the silver screen, the movies, and cinema the last of these is commonly used, as an overarching term, in scholarly texts and critical essays. In early years, the word sheet was sometimes used instead of screen. Film in general is not a good term to refer to a long standard commercial video production since it’s ambiguous in general and therefore requires context for correct interpretation.

Other major films have postponed releases in certain countries. The Pixar film Onward, released on the opening March weekend, was not opened in the areas most affected by the coronavirus outbreak while cinemas were closed in China, it also chose not to open in South

Korea, Italy or Japan.90 Other March 2020 releases A Quiet Place Part II and Mulan postponed their releases in affected areas, too. This prompted worry that, should March film openings underperform, blockbusters set for release in May specifically DisneyMarvels Black Widow and Universals F9 would move their dates later in the calendar.187 Mulan not opening in China, where it aimed to make most of its money, was particularly concerning,91 especially with the possibility that pirate copies will appear and prevent Chinese moviegoers from going to see it in cinemas when it is released.9 Comparatively, A Quiet Place Part II had not anticipated a large Chinese draw, as the box office for the first film in the country was only 10% of its total.7
